ROSE – 2025

|                 |                                                                                                                                                                                                                                                                                                                             |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DENOMINATION    | IGP PAYS D'OC                                                                                                                                                                                                                                                                                                               |
| GRAPPES VARIETY | Syrah, Grenache                                                                                                                                                                                                                                                                                                             |
| ALCOHOL CONTENT | 12,5 %vol                                                                                                                                                                                                                                                                                                                   |
| pH              | 3,47                                                                                                                                                                                                                                                                                                                        |
| TOTAL ACIDITY   | 3,07                                                                                                                                                                                                                                                                                                                        |
| TASTING         | <p>Appearance: Pink with peachy hues.</p> <p>Nose: Aromatically rich, with notes of fresh red berries and tangy candy.</p> <p>Palate: Expressive and lingering, with a fresh and aromatic finish.</p>                                                                                                                       |
| TERROIR         | <p>The diversity of our terroir, with vineyards close to the sea and sandy-clay soils. Our wines are the result of a dialogue between the sea and the garrigue.</p> <p>The richness of our terroir extends from sandy soils close to the sea to stony soils composed of calcareous sandstone and marl on our hillsides.</p> |
| WINEMAKING      | <p>Night-time parcel harvesting by grape variety to preserve the berries' aromatic profile and sanitary condition.</p> <p>Direct pressing, static settling, traditional alcoholic fermentation at 14–16°C, followed by ageing in concrete tanks on the lees.</p> <p>Selection and blending of our finest tanks.</p>         |
| SERVICE         | <p>Serving temperature: 10–12°C</p> <p>Food pairings: Ideal as an aperitif, with salads, grilled dishes, summer cuisine or Mediterranean dishes.</p>                                                                                                                                                                        |
